

PATIENT DISCHARGE INSTRUCTIONS

Patients should carefully follow discharge instructions provided by healthcare professionals after leaving the hospital.

General Instructions:

- Take medications as prescribed
- Attend scheduled follow-up appointments
- Maintain recommended dietary guidelines
- Monitor symptoms carefully

Patients should immediately contact healthcare providers if they experience:

- Difficulty breathing
- Severe pain
- High fever
- Uncontrolled bleeding
- Sudden worsening of symptoms

Follow-Up Care:

Patients may be required to schedule follow-up visits within 7 to 14 days after discharge.

Patients recovering from surgery should avoid heavy physical activity unless approved by healthcare providers.

Telehealth follow-up consultations may be available for eligible patients.

Emergency symptoms should not be managed through telehealth systems.

Patients should contact emergency services for life-threatening conditions.
