

PATIENT PRIVACY AND HIPAA GUIDELINES

Patient privacy and confidentiality are important responsibilities of healthcare organizations.

Healthcare providers must protect patient medical information from unauthorized access or disclosure.

Patient records may only be accessed by authorized healthcare personnel involved in patient care.

Patient information cannot be shared with third parties without patient consent except when required by law.

Healthcare staff must use secure systems for storing and transmitting medical records.

Patients have the right to:

- Request access to their records
- Request corrections to inaccurate information
- Receive information about data usage

Electronic health records must be protected using secure authentication systems.

Unauthorized sharing of patient information may result in disciplinary or legal action.

Telehealth consultations must use secure communication platforms to protect patient privacy.
